Tree Survey Schedule

Symbol	Tree Retention Category
	Trees to be retained
	Trees to be removed for reasons of sound arboricultural management
	Trees for removal affected by the proposed development (subject to change depending on final layout)

Notes:

This drawing to be read in conjunction with all relevant Architects & Engineers drawings & specifications.
 For construction and site works refer to Civil Engineering drawings.
 Do not scale from this drawing. Use figured dimensions only.

Refer also to our Tree Survey Report Ref: 19.11.SKH.01 carried out on 21st. February 2020.

Retained trees shall be reassessed on completion of any construction phase and may require remedial works in order to reduce risk.

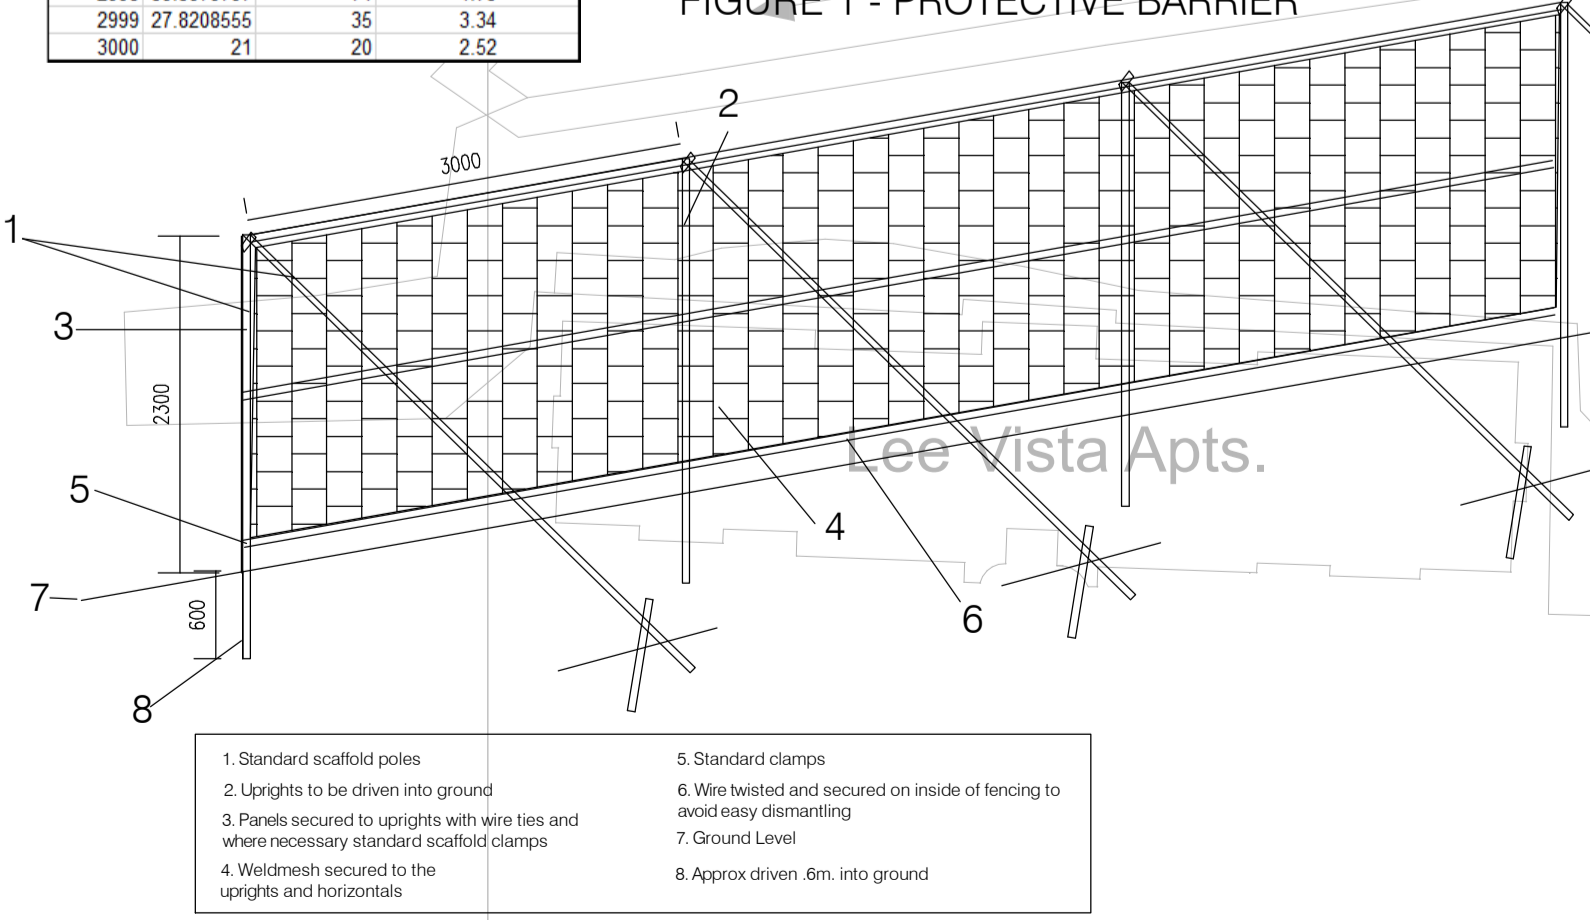

Protection of retained trees shall be in accordance with BS 5837:2012 Trees in relation to Design Demolition and Construction - Recommendations.

Site Specific Tree Protection measures:

- To help protect existing root structures, no construction machinery shall enter into or traverse the hashed areas 'A' during the construction phase.
- Topsoil shall not be deposited within these zones and excess topsoil shall be moved off site.
- Any excavation along the verges of these zones shall be hand dug only, taking care not to damage or disrupt existing root patterns.
- Retain and protect individual trees of Sycamore and Cotoneaster in the lower grounds close to the southern boundary and incorporate with new proposed planting.
- Tree no. 0074 is a mature Sycamore and is growing close to walls and structures. Protect and retain in the short-term until new planting is established.

Adjoining Site, Atkins Hall Apts.

FIGURE 1 - PROTECTIVE BARRIER

- Standard scaffold poles
- Sprights to be driven into ground
- Wires secured to sprights with wire ties and where necessary standard scaffold clamps
- Wire mesh secured to the sprights and horizontals
- Standard clamps
- Wire twisted and secured on inside of fencing to avoid easy dismantling
- Ground Level
- Approx driven 6m. into ground
